Amalia Calderón-Argelich (Amalia.Calderon@uab.cat - @AmaliaArgelich) is a PhD researcher at ICTA-UAB (BCNUEJ and LASEG groups). She holds an MSc in Interdisciplinary Studies in Environmental, Economic and Social Sustainability with a specialization in Science and Management of Global Change from ICTA-UAB and a Bachelor's degree in Biology from the Universitat de Barcelona. Her doctoral research covers the planning and implementation of ecosystem services and green infrastructure within urban greening agendas and its implications in terms of environmental justice. She is currently investigating the incorporation of plural values and demands of socially vulnerable residents and the effective inclusion of them in urban greening decision-making processes. She is also interested in bringing aspects of equity, inclusion and accessibility into the ecosystem services framework with a feminist and intersectional research perspective.

La Dra. **Helen Cole** és una investigadora postdoctoral del Laboratori per la Justícia medioambiental i la Sostenibilitat de Barcelona, grup afiliat a l'Institut de Ciència i Tecnologia Ambientals de la Universitat Autònoma de Barcelona i també afiliat al departament d'epidemiologia i salut pública de l'Institut Hospital del Mar d'Investigacions Mèdiques. La Dr.Cole està doctorada en salut pública per la Universitat de la Ciutat de Nova York. També té un màster en comportament i educació sanitària de la Universitat de Carolina del Nord a Chapel Hill. Partint dels camps de la sociologia, la geografia crítica i la planificació urbana la seva recerca desafia les perspectives tradicionals de la salut pública qüestionant i avaluant els impactes a llarg termini que les intervencions urbanes poden tenir sobre la justícia social (per exemple, avaluant la possible gentrificació ambiental/verda derivada de l'enverdiment urbà). La seva recerca actual explora si les ciutats més saludables són també més equitatives. D'aquesta manera, col·loca les intervencions en salut en un context ampli social i políticament.

ROSER MANEJA ZARAGOZA

PhD in Environmental Science (UAB, 2011). Deputy Research Director of CTFC (Forest Science and Technology Centre of Catalonia) and senior researcher at Bioeconomy and Governance Program combining my research interests with teaching in higher education institutions mainly as an associated Professor in the Geography Department of the Universitat Autònoma de Barcelona.

I am an active member of multidisciplinary research groups at the Geography Department at UAB and visiting professor in CIGA (Centro de Investigaciones en Geografía Ambiental), Mexico. My expertise ranges in the following fields: socio ecological systems (forests); biodiversity; global change; environment and human health, natural protected areas (mainly Biosphere Reserves) and natural resources management.

I have experience as supervisor for master and PhD candidates. I have been involved in more than 50 publications, including several articles published in SCI journals, more than 20 book chapters and a huge number of communications in national and international events as well as popular science papers.

As an associated professor I focus my university teaching in the bachelor's degree in Geography (Biodiversity and Habitats) and Environmental Sciences (Courses: "Organització i gestió de projectes and "Treball final de grau").

I am an active member of the Club of Rome (Spanish and Catalan Chapter); the scientific coordinator of the International UNESCO Center for the Mediterranean Biosphere Reserves; a scientific advisor of the Barcelonca City Council (Ecology, Urbanism, Infrastructure and Mobility Area) and a scientific advisor of La Casa de l'Aire – Fundació Roger Torné.

Isabel Ruiz-Mallén (ORCID: 0000-0002-9679-3329):

I am an Environmental Scientist (UAB, 2002) with a M.Sc. degree in Biological Sciences (UNAM, 2005) and a Ph.D. in Environmental Sciences (ICTA-UAB, 2009). My training also includes pre- and postdoctoral research visits in other well-recognized and prestigious universities and research centers worldwide: University of Deakin (Australia), University of Kent (United Kingdom), Universidade de Sao Paulo (Brazil) and Instituto de Ecología, A.C. (Mexico). Currently, as a “Ramón y Cajal” research fellow at the IN3-Universitat Oberta de Catalunya (UOC), I’m leading a research line focused on knowledge co-production to shed light on the understanding of processes of collaborative creation of knowledge for a myriad of purposes related to sustainability: climate change adaptation, urban resilience, biodiversity conservation, environmental and science education. We analyse sustainability education practices at schools, learning initiatives from the grassroots in informal contexts and citizens’ involvement in formal decision-making to provide critical insights into the political, ecological, social and cultural dimensions of knowledge transmission, learning and co-production. We also explore the potential of innovative and participatory methodologies, such as those based on artistic approaches, to foster transformative learning in response to current sustainability challenges.

Marc Marí-Dell'Olmo

és graduat en Estadística (UAB-UVic) i Màster en Estadística i Recerca Operativa (UPC-UB). A més, ha completat la seva formació amb estudis en epidemiologia i salut pública realitzant el Màster de Salut Pública (UPF) i el Doctorat en Biomedicina (UPF). Actualment és tècnic superior en salut pública en el Servei de Qualitat i Intervenció Ambiental (SEQUIA) de l'Agència de Salut Pública de Barcelona essent la seva principal línia de treball l'abordatge de l'impacte del canvi climàtic en la salut pública. Així mateix, és investigador del "Centro de Investigación Biomédica en Red de Epidemiología y Salud Pública" (CIBERESP) i de l'Institut d'Investigació Biomèdica Sant Pau (IIB Sant Pau), sent les seves principals línies de recerca les desigualtats socials en salut, l'epidemiologia espacial, l'avaluació d'intervencions i la pobresa energètica, sobre les que compta amb diverses publicacions internacionals. Ha sigut investigador principal del projecte PENSA i investigador en diversos projectes nacionals i internacionals, com el projecte MEDEA, INEQ-CITIES, EURO-HEALTHY i Climate-fit.city. En el camp de la docència, ha estat professor associat de la UPF i docent en diversos cursos d'anàlisi de dades espacials en salut i de metodologia per a l'avaluació en salut pública.

Margarita Triguero-Mas

Ambientòloga treballant en la intersecció de la salut pública, la planificació urbana i la justícia mediambiental. És una científica reconeguda mundialment com a experta en els beneficis de la natura per la salut humana, especialment inequitats/injustícies en salut.
